

We are inviting you to take part in the **ENRICH project seminar** for associated partners that will take place **on the days of 26 - 27 March 2009, in Vilnius, Lithuania.**

ENRICH is an eContentPlus project whose main aim is to aggregate digital content from remote digital repositories and digital libraries seamlessly under the interface of the Manuscriptorium Digital Library (<http://www.manuscriptorium.eu>). The ENRICH project has 18 direct partners and besides them already more than 40 Czech and 30 foreign collections share (or are about to share) their data in Manuscriptorium.

The seminar is targeting the future Manuscriptorium contributors independently of the fact whether they operate their own digital libraries or they are just newcomers in this field. The functionalities of Manuscriptorium as well as the methods of practical cooperation will be demonstrated including presentations of successfully cooperating partners.

Preliminary programme:

March 26th

- **Introducing ENRICH**
- **Methods of cooperation in ENRICH**
 1. M-Tool (creating of the structural and descriptive metadata for individual documents)
 2. Off-line connector (converting existing structural and descriptive metadata content off-line)
 3. On-line connector (converting existing structural and descriptive metadata content using OAI-PMH interface)
 4. Offline automated generation of structural metadata and connector of existing descriptive metadata (see below for details)
- **TEI P5 and XML concept introduction**
- **Practical examples and experiences from associated partners**
- **Translation Interface demonstration**
- **Round table discussion with the main technical partners**

March 27th

TEI P5 workshop for all interested stakeholders - requires separate registration

The short course held by Oxford University Computing Service course intends to provide a good introduction to the Text Encoding Initiative (TEI) Guidelines for the Encoding of Digital Texts. The course aims at those who have some technical knowledge (for example, the ability to use e-mail and the web) and are aware of the potential of digital texts. It was also suitable for technical support staff working with such users.

The participation on the seminar is free of charge. The participants are expected to cover their travel expenses. If you are interested in participation on the seminar or receive more detailed information, please contact the organizers at one of the following addresses:

Nerute Kligiene, Institute (Institute of Mathematics & Informatics, technological ENRICH partner) by nerute@ktl.mii.lt, phone +370 5 2660386 or Skype - nerutei)
